### **Mosquito Lawn Treatment-Client Information and Preparation Instructions**

Safeway Pest Management Co., Inc. has been contracted to perform a preventative insect control treatment to the lawn. In order for us to perform this service, we will need your full cooperation.

In preparation for this treatment, we ask that you stake the corners of your property. Please do not water your lawn on the day of treatment, but do mow your lawn the day before treatment. We ask that you tie a ribbon around any fruit trees so that we may avoid them. We also ask you to remove any and all contents from the lawn area. The following list includes, but is not limited to some of the items to be removed: All children's toys, bikes, balls, scooters, (stationary sandboxes should be covered with plastic), hoses, gardening tools, lawn and patio furniture, barbeque grills (if grills are stationary, a plastic cover will suffice)

Pets- Please make sure all pets are removed from the area while treatment is being performed and **DO NOT** allow pets back into the area until it is completely dry.

This treatment will not harm vegetation, such as trees, flowers, shrubs, etc; however, fruit and vegetable plants must be covered, or if possible, removed from the area.

### **ALL WINDOWS AND DOORS MUST BE KEPT COMPLETELY CLOSED DURING THIS TREATMENT!**

**Overspray is possible on windows, doors and house if grass area meets the house.**

Treatment can take 1-3 days for a significant drop in number.

Safeway Pest Management specifically disclaims and all liability for any illnesses and or disease contracted or allegedly contracted by exposure to mosquitoes. These include, but are not limited to, West Nile Virus, Malaria, Powassan, Encephalitis and Dengue Fever. Safeway Pest Management is not medically trained to diagnose mosquito borne illnesses or disease. Please consult your physician for any medical diagnosis. Safeway Pest Management's mosquito control program is designed to help manage the mosquito population on your property. Since mosquitoes are airborne insects, Safeway Pest Management cannot guarantee 100% elimination of mosquitoes from your property. Therefore, Safeway Pest Management does not expressly guarantee or imply that it will completely eradicate all mosquitoes and specifically disclaims all implied warranties.

To the full extent permitted by law, Safeway Pest Management will not be liable for personal injury, property damages, loss of use or any other damages whatsoever, including consequential and incidental damages arising from this service.

Your building is scheduled to be treated on \_\_\_\_\_ starting between \_\_\_\_\_. Please be completely prepared before the arrival of the technician, as the treatment cannot be completed if preparation work is not done. This treatment shall be performed by a licensed, state certified technician(s) using EPA registered materials.

If you have any questions prior to or following this treatment, please feel free to call our office.
